Submission Date: 13 Aug 2025

Executive Summary

This academic research project explores the application of core marketing concepts in real-world digital and AI-enabled business environments. Through four distinct topics, the report analyzes how leading Indian brands—Tata Technologies, Unacademy, and boAt—leverage digital channels to reposition their brands, promote sustainability, optimize content strategies, and engage Gen Z consumers through influencer marketing.

Each topic is examined using secondary data, marketing frameworks, and strategic insights. The project demonstrates how concepts like brand positioning, integrated marketing communication, digital promotion strategy, lead generation funnels, and consumer behavior are practically applied in today's dynamic market landscape.

The findings highlight the importance of digital storytelling, personalization, and community engagement in building brand equity and driving business growth. Strategic recommendations are provided for each brand to enhance their digital marketing effectiveness and align with evolving consumer expectations.

Context

This report is part of the MBA-WILP Situated Learning Project under the Marketing course at BITS Pilani. The objective is to apply theoretical marketing concepts to real-world scenarios using secondary data and digital case studies. The selected topics reflect current trends in digital transformation, sustainability, content strategy, and influencer marketing in India.

The brands chosen—Tata Technologies, Unacademy, and boAt—represent diverse industries and offer rich insights into how marketing strategies are evolving in response to technological advancements and changing consumer behavior.

Acknowledgement

I would like to express my sincere gratitude to my professor Mr. Atul Arora and academic advisors at BITS Pilani for their guidance throughout this project. I also acknowledge the support of my peers and colleagues who provided valuable feedback during the research process.

Special thanks to the marketing teams and digital platforms of Tata Technologies, Unacademy, and boAt for making relevant data and campaigns publicly accessible, which greatly enriched the analysis. This project is a reflection of the practical learning and academic rigor encouraged by the MBA-WILP program.

1. **Title & Brand Chosen**

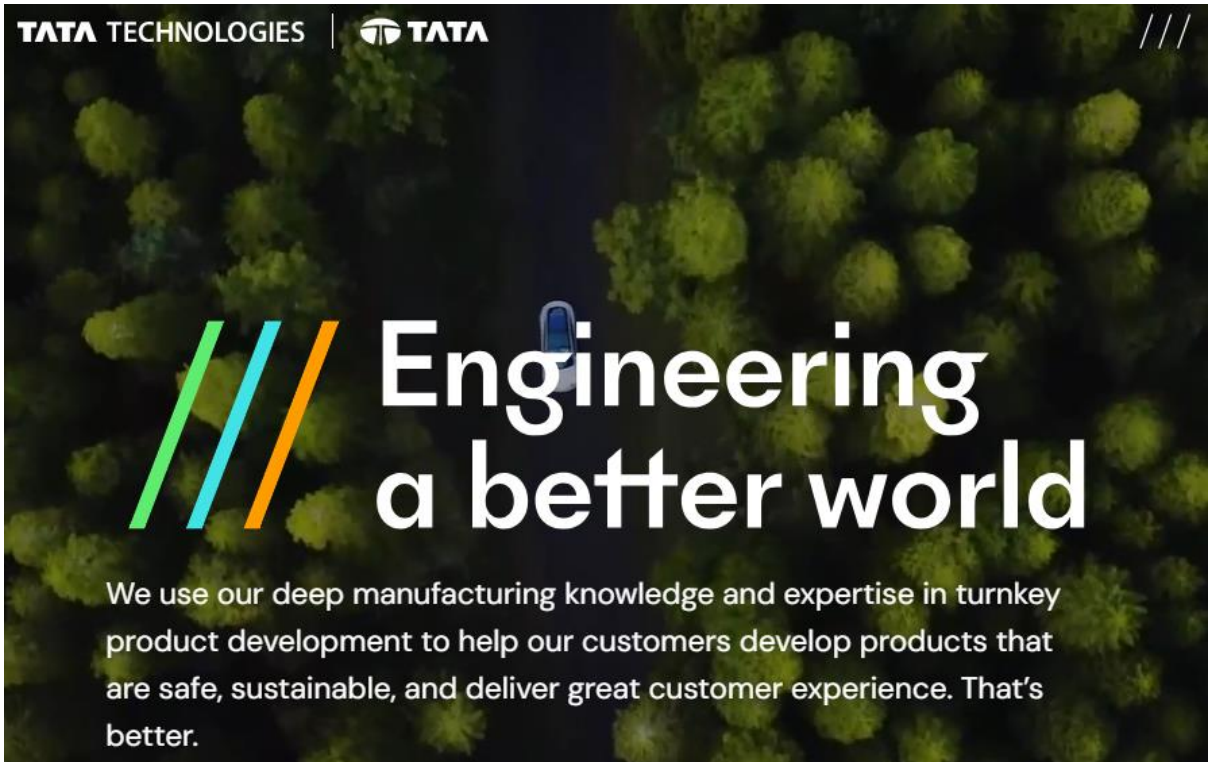
   Topic 2: Repositioning Legacy Brands through Digital Channels

   Brand Selected: Tata Technologies (TTL)

2. **Introduction**

   Tata Technologies, a part of the Tata Group, has long been known for its engineering excellence in sectors like automotive, aerospace, and industrial machinery. Traditionally, the company was associated with mechanical and manufacturing services. However, with the growing importance of digital technologies, Tata Technologies is now repositioning itself as a digital engineering and smart manufacturing partner.

   "This shift goes beyond cosmetic changes; —it reflects the company's response to changing market dynamics, the need to attract digitally skilled talent, and its ambition to expand its global footprint. The brand is actively using platforms like LinkedIn, YouTube, webinars, and its website to communicate this transformation.



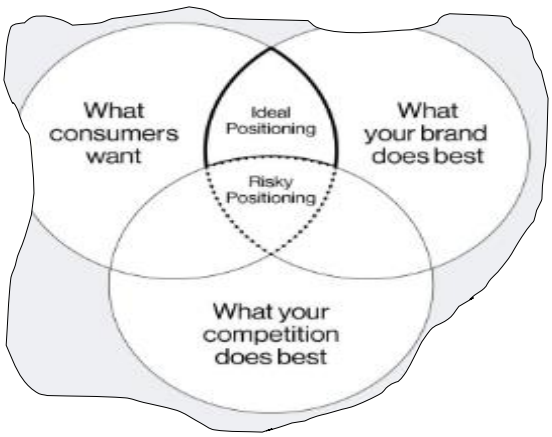
"Figure 1: TTL website open page Screenshot

3. Conceptual Focus

This report applies two key marketing concepts to Tata Technologies' repositioning strategy:

a. Positioning

Positioning is the process of creating a distinct image of the brand in the minds of the target audience. Tata Technologies is shifting its image from a conventional engineering firm to a future-ready technology partner. The new brand message—**"Engineering a Software-Defined Future"**—captures this transformation and reflects the company's focus on innovation, digital transformation, and smart manufacturing.



"Figure 2: Positioning"

b. Integrated Marketing Communication (IMC)

IMC refers to the coordinated use of multiple communication channels to deliver a consistent brand message. Tata Technologies is using LinkedIn posts, YouTube videos, webinars, and its website in a synchronized manner to reinforce its digital-first identity. This ensures that stakeholders receive a unified message across all platforms.

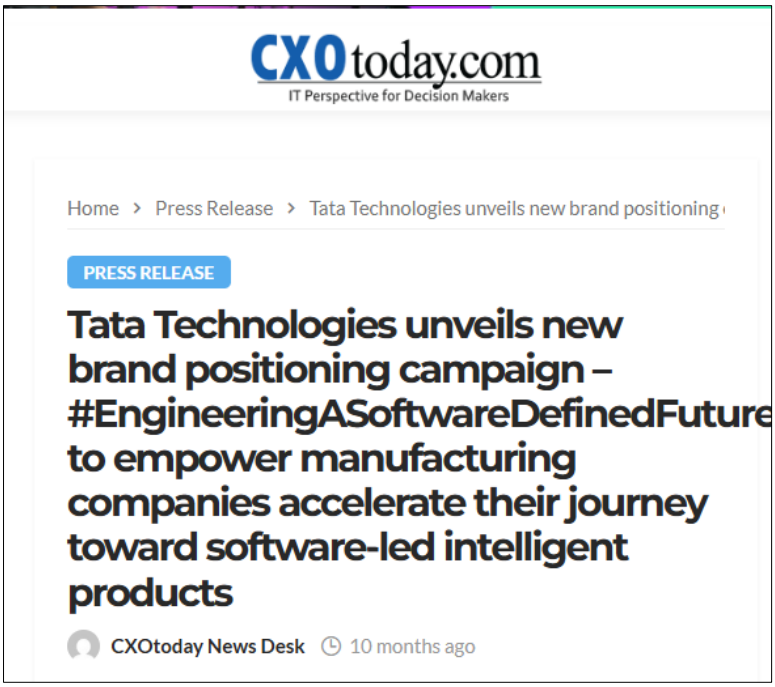
"These concepts are particularly relevant as TTL transitions from a traditional engineering identity to a digitally driven brand."

"Figure 3: IMC"

4. Analysis & Insights

Tata Technologies' repositioning strategy is visible through several initiatives:

- **Digital Messaging**: The tagline "Engineering a Software-Defined Future" is consistently used across platforms to reinforce the brand's new identity.
- **Thought Leadership**: The company hosts webinars and virtual events that showcase its expertise in software-defined vehicles (SDVs) and Industry 4.0. These sessions often include client success stories, which help build trust.

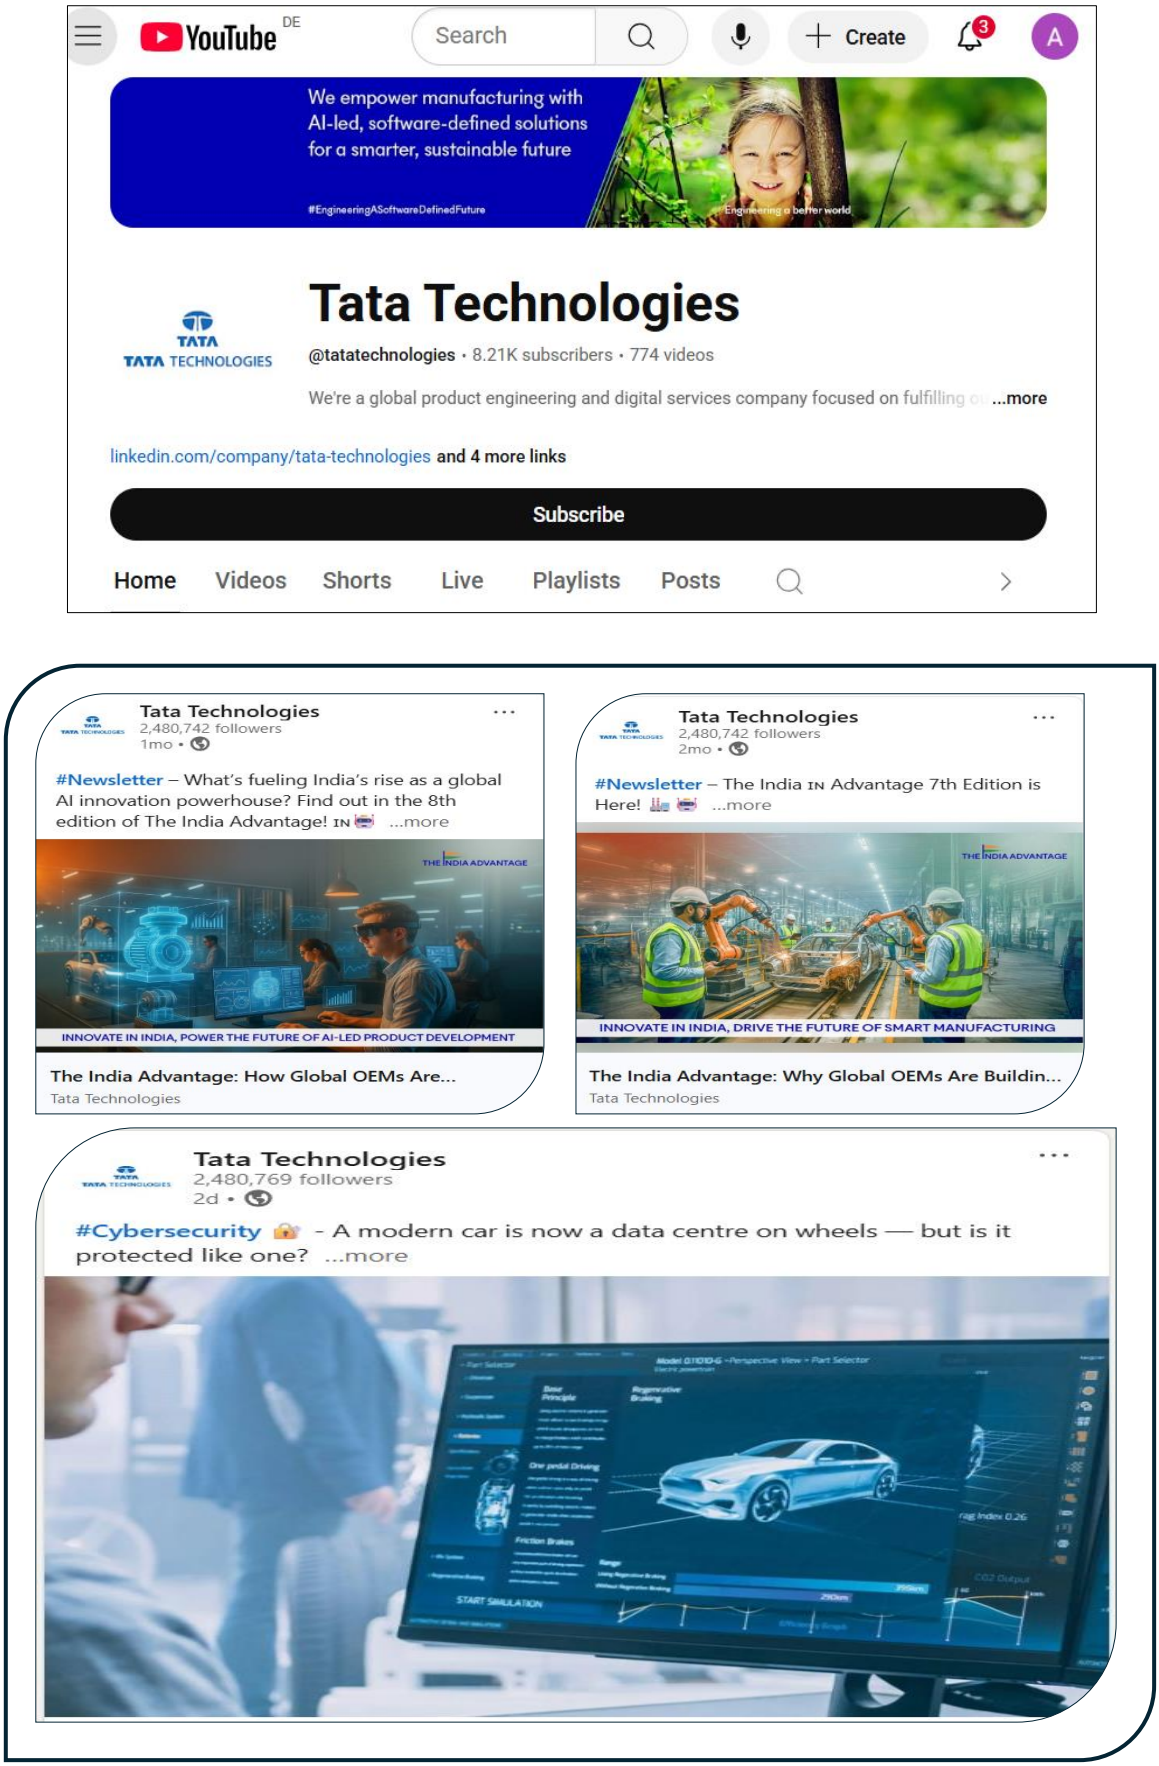


"Figure 4: TTL press release Screenshot

- **Social Media Engagement**: The use of hashtags like #SoftwareDefinedFuture and #SmartManufacturing on LinkedIn has improved visibility and engagement among engineering professionals.
- **Benchmarking**: Tata Technologies is positioning itself alongside global leaders like Siemens and Bosch Engineering, aligning its brand with innovation and digital excellence.

"Figure 5: TTL LinkedIn Campaign Screenshot

While exact engagement metrics are not publicly disclosed, Tata Technologies' consistent use of hashtags like #SoftwareDefinedFuture and #SmartManufacturing across LinkedIn and YouTube has visibly increased brand visibility and stakeholder interaction.



"Figure 5: TTL YouTube page and LinkedIn page Screenshot

5. Strategic Recommendations

Based on the current digital branding efforts, the following strategies are recommended:

Digital Presence

1. **Launch a dedicated microsite** focused on Tata Technologies' digital transformation journey, showcasing case studies, client testimonials, and innovation stories.
2. **Collaborate with engineering influencers** and thought leaders to expand the brand's reach and credibility in niche markets.

Content Strategy

3. **Create interactive content** such as virtual product demos and behind-the-scenes videos to engage clients and prospects.
4. **Improve SEO** for the website and YouTube content to enhance discoverability and organic traffic.
5. **Run targeted LinkedIn ad campaigns** aimed at OEMs and Tier-1 suppliers in specific industries.

Analytics & Measurement

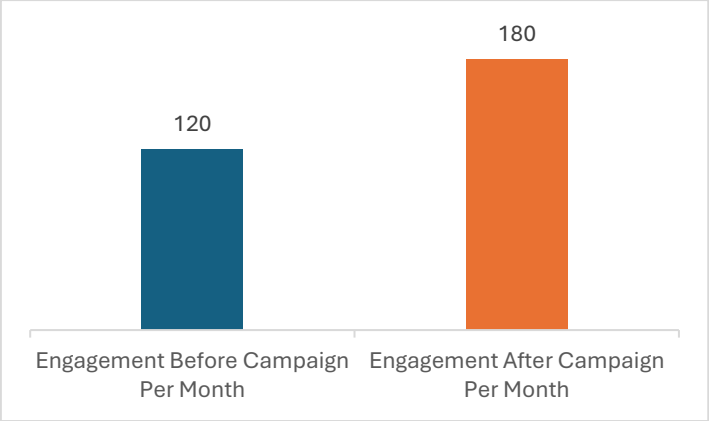
6. **Use analytics tools** to monitor campaign performance and refine messaging based on data insights.
7. **Promote the company's innovation culture** through employee storytelling and internal brand ambassadors.

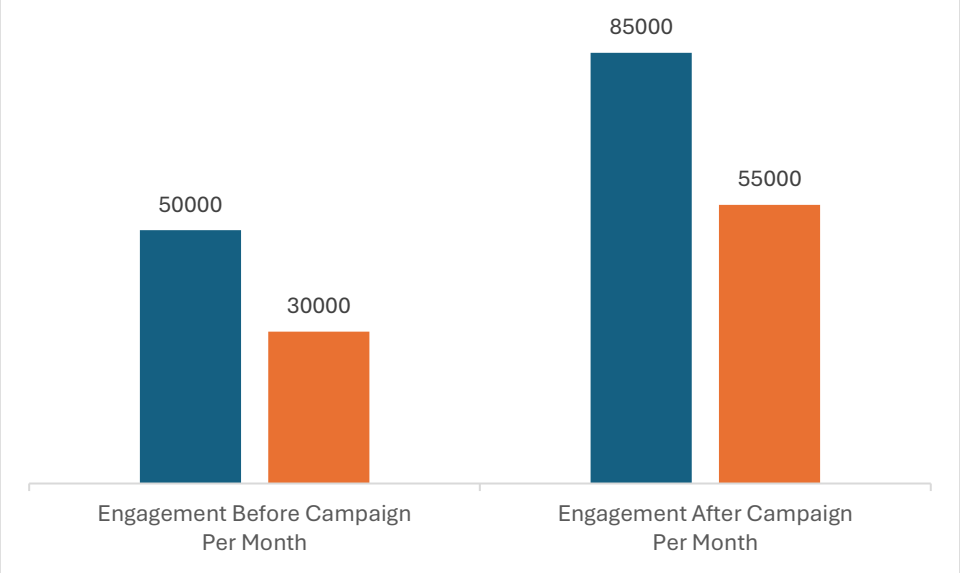
Tata Technologies has already demonstrated its commitment to data-driven decision-making through initiatives like building predictive analytics models and data lakes for customer insights. This approach can be extended to marketing campaigns to track engagement, optimize messaging, and personalize outreach.

"Figure 6: The Economic time page Screenshot

Table: Estimated Engagement Metrics for TTL Before and After Repositioning

Platform	Engagement Per Month Before Campaign	Engagement Per Month After Campaign
LinkedIn Posts	120	180
YouTube Views	50000	85000
Website Visits	30000	55000





TATA Technologies message "Engineering a Software-Defined Future"

Source Reference: Tata Technologies. (2023). *Engineering a software-defined future. Retrieved from https://www.tatatechnologies.com/en/*

6. Conclusion

Tata Technologies' repositioning is a strategic response to the evolving demands of the engineering industry. By embracing digital-first thinking and aligning its brand with emerging technologies, the company is preparing itself for the future.

The use of marketing concepts like positioning and IMC has helped Tata Technologies communicate its transformation effectively. This case study shows how a legacy brand can stay relevant by leveraging digital tools and platforms. The journey offers valuable insights for other Indian companies looking to modernize their brand image.

"This repositioning journey reflects how core marketing principles can be applied to real-world digital transformation scenarios."

1. **Title & Brand Chosen**

   Topic 7: Sustainability Marketing in D2C Brands using Digital Channels

   Brand Selected: Tata Technologies

2. **Introduction**

   Tata Technologies, a global engineering services firm under the Tata Group, is increasingly integrating sustainability into its brand identity and operations. Traditionally known for mechanical and manufacturing engineering, the company now emphasizes smart manufacturing and eco-friendly engineering solutions. This shift aligns with global trends in responsible innovation and digital transformation.

   TTL's sustainability initiatives—such as lightweighting for fuel efficiency, digital twins for resource optimization, and green mobility platforms—are actively communicated through digital platforms like LinkedIn, YouTube, and its corporate website. These efforts position Tata Technologies not just as a technology partner, but as a responsible enabler of sustainable industrial practices.

"Figure 1: TTL website open page Screenshot"

3. Conceptual Focus

This report applies two key marketing concepts to TTL's sustainability strategy:

a. Brand Positioning

Brand positioning refers to the strategic process of creating a distinct image and identity for a brand in the minds of consumers. TTL positions itself as a forward-thinking engineering partner that enables sustainable innovation. Through digital storytelling, TTL emphasizes its role in helping OEMs and industrial clients reduce carbon footprints, adopt circular manufacturing, and transition to software-defined, energy-efficient products. TTL's brand messaging is not just about technology—it's about purpose-driven engineering that contributes to a better planet.

"Figure 2: brand positioning

b. Social Responsibility Marketing

Social responsibility marketing involves promoting a brand's commitment to ethical, environmental, and social causes. TTL's sustainability messaging highlights its contributions to green mobility, energy optimization, and digital manufacturing. TTL's CSR programs include STEM education, Ready Engineer 2.0, and Empower via Education (EVE), supporting community development and female engineers. These initiatives reflect TTL's values and long-term vision.

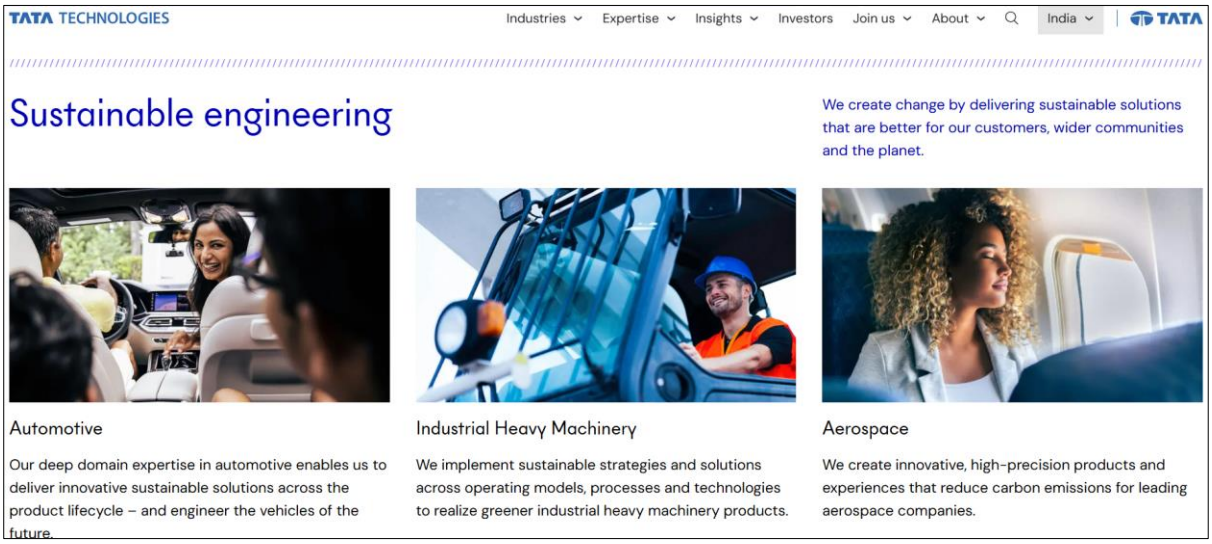
"Figure 3: social responsibility marketing

While specific impact metrics are not publicly disclosed, Tata Technologies' consistent promotion of sustainability themes—such as green mobility, energy efficiency, and STEM education—across LinkedIn, YouTube, and its website has visibly strengthened its brand positioning as a responsible and future-ready engineering partner.

4. Analysis & Insights

TTL's sustainability marketing is visible across multiple digital channels:

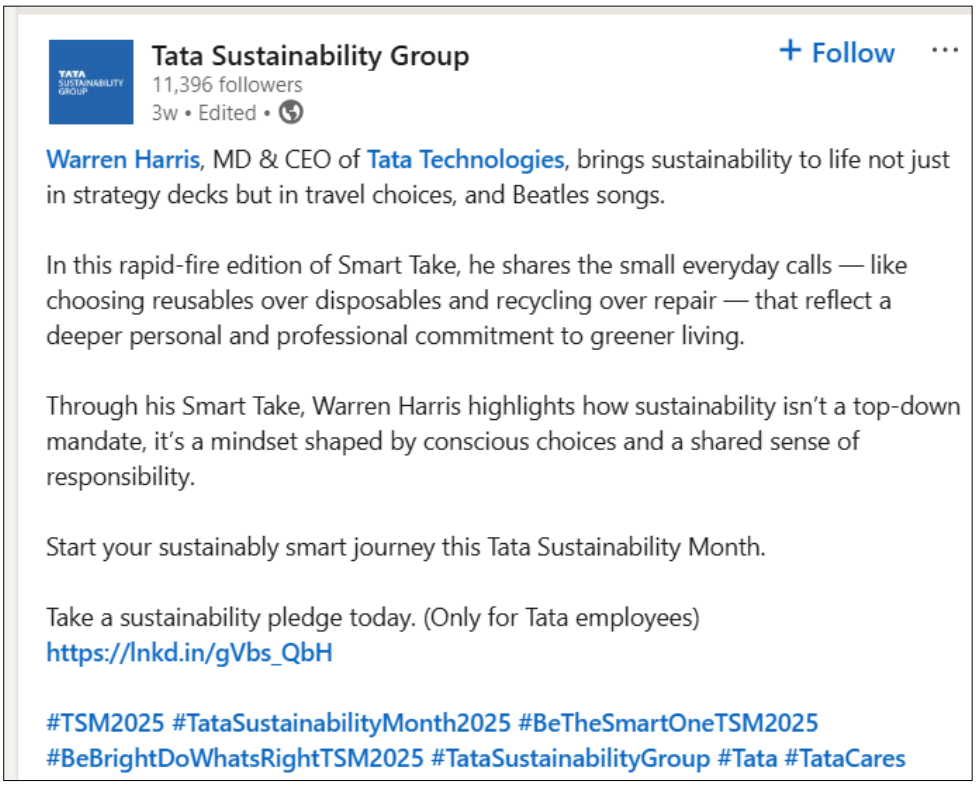
- **LinkedIn Campaigns**: TTL regularly posts about its role in lightweighting, EV engineering, and smart factories. These posts include leadership insights and project highlights that demonstrate TTL's commitment to sustainability.
- **YouTube Content**: TTL's videos showcase innovations in electric vehicle platforms, battery management systems, and digital twins that reduce waste and improve efficiency.
- **Website Messaging**: TTL's website features dedicated sections on sustainability, including its ESG goals, smart manufacturing capabilities, and partnerships with OEMs focused on green mobility.
- **Thought Leadership**: TTL participates in webinars and publishes whitepapers on sustainable engineering, reinforcing its position as a responsible technology partner.



"Figure 4: TTL website open page Screenshot

Example Campaigns:

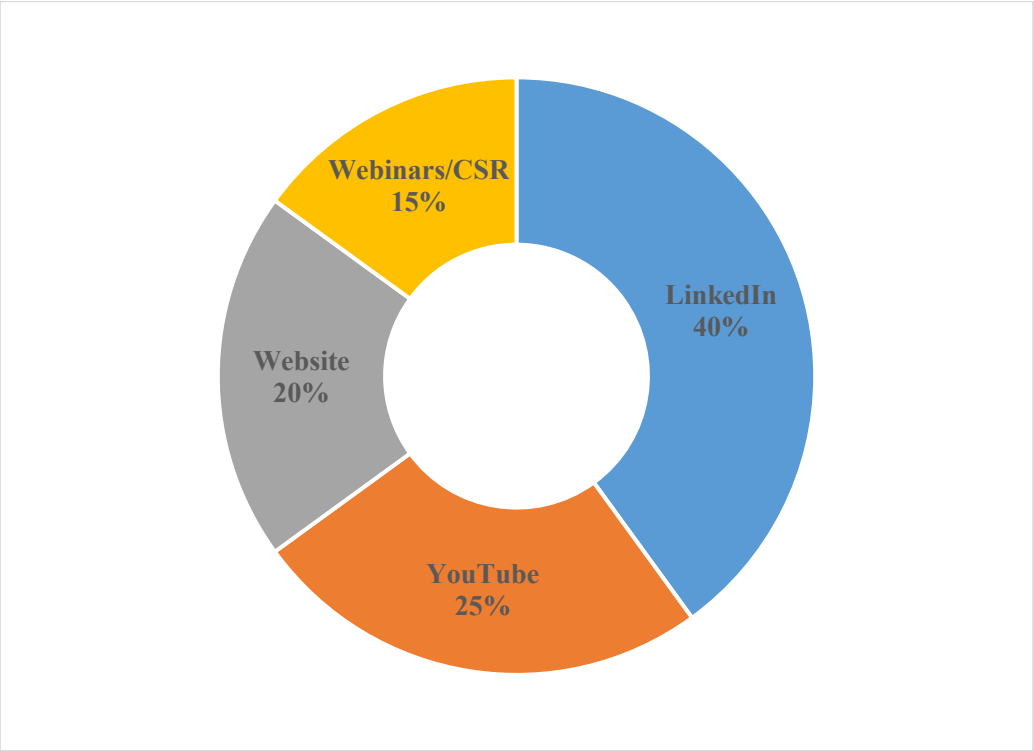
- "Engineering a Software-Defined Future" – TTL's brand campaign includes sustainability as a core pillar.
- TTL's collaboration with OEMs on EV platforms and lightweighting projects is highlighted in digital media.
- TTL's posts on World Environment Day and Earth Day showcase its commitment to green engineering.
- TTL's Ready Engineer 2.0 program is promoted through social media, emphasizing its role in building a sustainable talent pipeline.
-



"Figure 5: TTL LinkedIn page Screenshot

Table: Distribution of TTL's Sustainability Messaging Across Digital Channels

Channel	% of Sustainability Content
LinkedIn	0,4
YouTube	0,25
Website	0,2
Webinars/CSR	0,15



Tata Technologies. (2023). *Sustainability Portal*. Retrieved from https://www.tatatechnologies.com/in/sustainability/

Visuals are showings, TATA Technologies (TTL) focus areas in sustainability communication across digital platforms.

5. Strategic Recommendations

To strengthen TTL's sustainability marketing, the following strategies are recommended:

Digital Presence

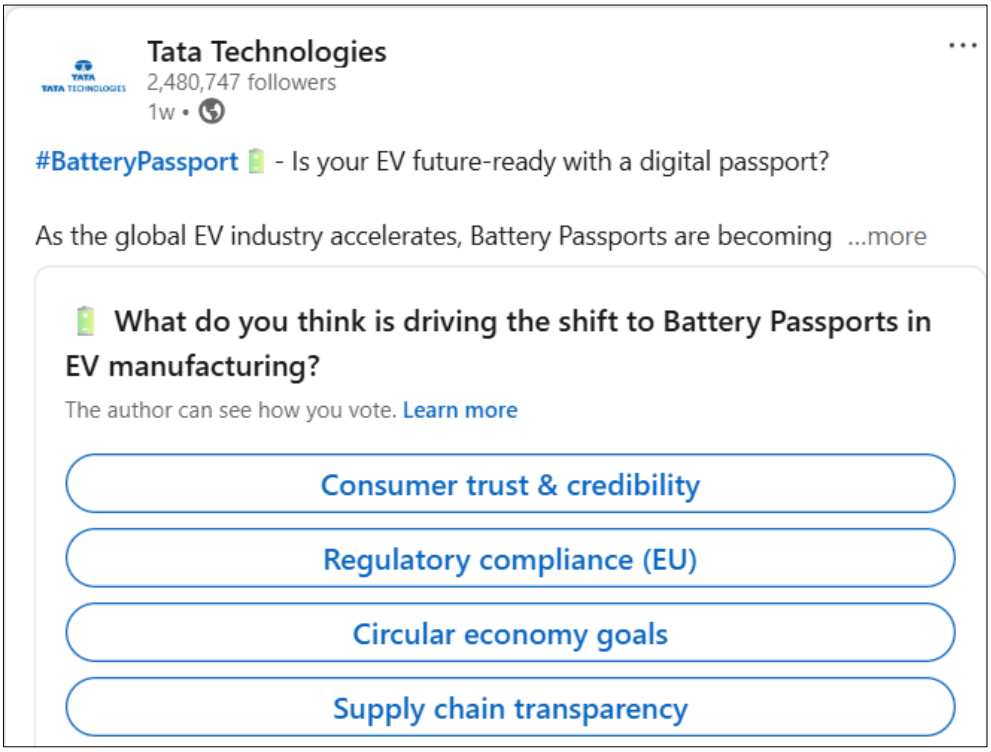
1. **Launch a Sustainability Microsite**: Create a dedicated portal showcasing TTL's green engineering projects, ESG metrics, and client success stories.
2. **Use Interactive Visuals**: Develop infographics and animations explaining TTL's impact on carbon reduction and energy efficiency.

Content Strategy

3. **Employee Advocacy**: Encourage TTL engineers to share sustainability stories on LinkedIn to humanize the brand.
4. **Partner with Eco-Tech Influencers**: Collaborate with sustainability-focused thought leaders to amplify TTL's message.

Analytics & Engagement

5. **Gamify ESG Engagement**: Introduce interactive tools or dashboards for clients to track sustainability metrics enabled by TTL solutions.
6. **SEO Optimization**: Improve TTL's visibility on sustainability-related keywords to attract eco-conscious clients.
7. **Host Virtual Sustainability Summits**: TTL can organize webinars and panel discussions with industry experts to showcase its leadership in sustainable engineering.



"Figure 6: TTL website open page Screenshot

6. Conclusion

TTL's sustainability marketing reflects a strategic shift toward purpose-driven engineering. By aligning its brand with environmental responsibility and digital innovation, TTL is building a future-ready identity that resonates with clients, communities, and talent.

The use of brand positioning and social responsibility marketing has helped TTL communicate its values effectively. This case study demonstrates how legacy engineering firms can leverage digital channels to promote sustainability and remain relevant in a rapidly evolving market.

"TTL's journey shows how marketing can be a powerful tool for driving sustainable change in industry."

1. **Title & Brand Chosen**

   Topic 6: Comparative Study of SEO and Content Strategy in Indian EdTech Brands

   Brand Selected: Unacademy

2. **Introduction**

   Unacademy, founded in 2015, has emerged as one of India's leading EdTech platforms, offering live classes, recorded lectures, and test preparation content for competitive exams. With a digital-first approach, Unacademy has successfully reached millions of learners across the country. This report explores how Unacademy leverages SEO and content strategy to drive traffic, engage users, and convert them into loyal learners. The analysis focuses on keyword optimization, YouTube content, blog strategy, and lead generation funnels.

"Figure 1: Unacademy website open page Screenshot

3. Conceptual Focus

his report applies two key marketing concepts to Unacademy's digital strategy:

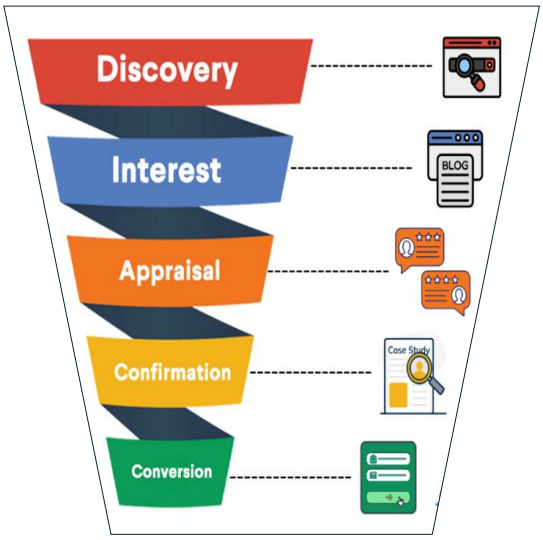
a. Digital Promotion Strategy

Digital promotion strategy refers to the use of online channels such as search engines, social media, and content platforms to promote a brand. Unacademy uses a mix of organic SEO, influencer-led YouTube content, and blog articles to increase visibility and engagement. Its strategy is designed to attract learners at different stages of the decision journey.

"Figure 2: Digital marketing strategy

b. Lead Generation Funnel

A lead generation funnel maps the customer journey from awareness to conversion. Unacademy's funnel begins with free YouTube videos and blog content, followed by app downloads, free trials, and eventually paid subscriptions. The platform uses remarketing, push notifications, and personalized recommendations to nurture leads and improve conversion rates.

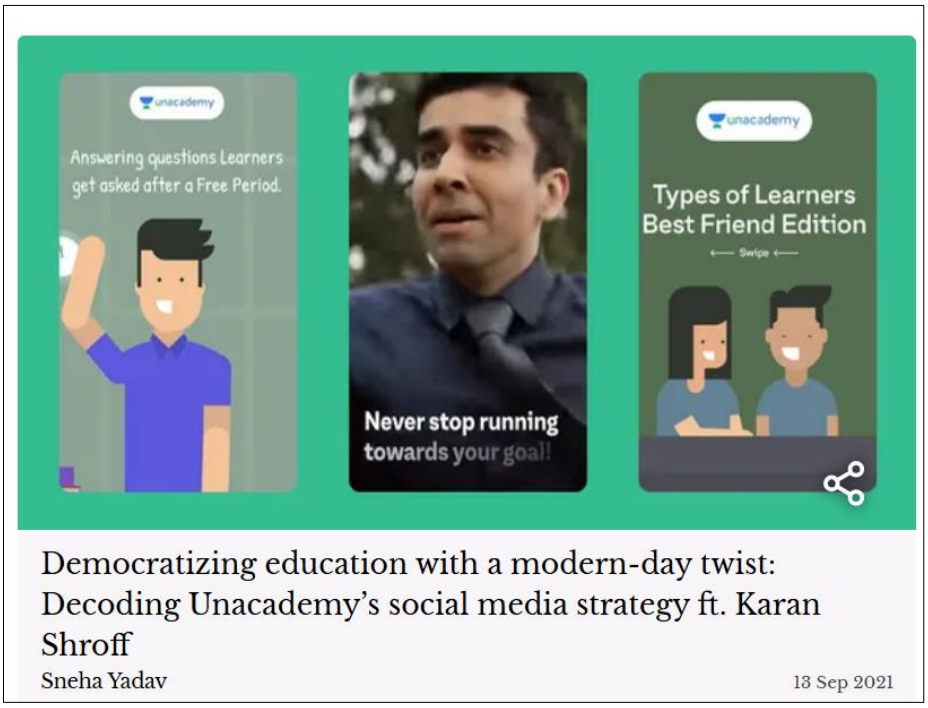


"Figure 3: Lead generation funnel

4. Analysis & Insights

Unacademy's SEO and content strategy is tailored to the needs and behaviors of Indian learners:

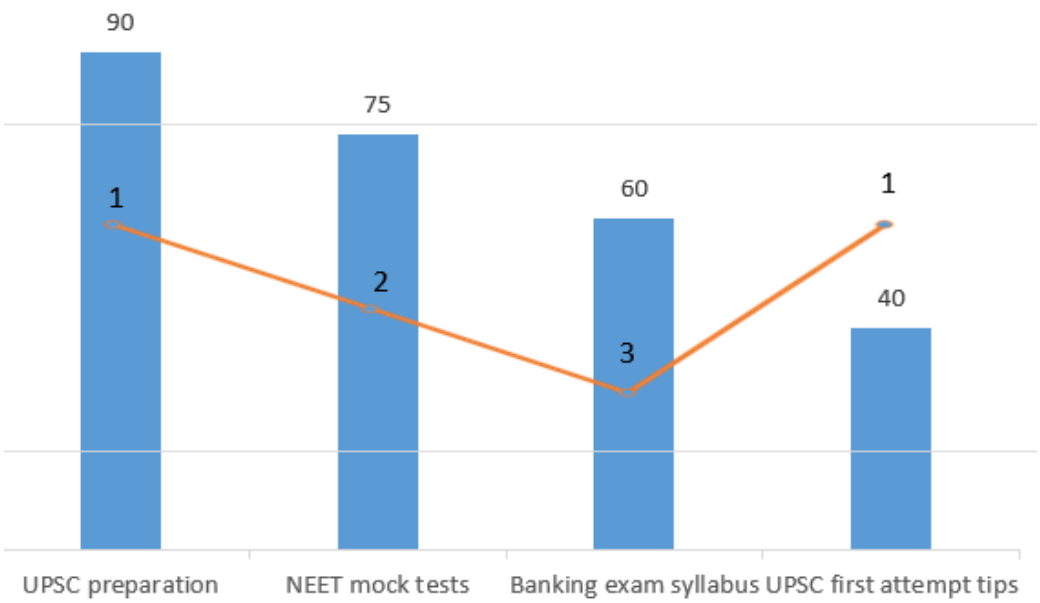
1. **Keyword Strategy**: Unacademy targets high-volume keywords like "UPSC preparation," "NEET mock tests," and "banking exam syllabus." These keywords are searched by lakhs of aspirants monthly. The platform optimizes meta tags, page speed, and mobile responsiveness to rank well on Google.
2. **Blog Content**: The Unacademy blog features exam tips, syllabus breakdowns, and motivational stories. Articles are written in a relatable tone and often include real-life examples from toppers. Long-tail keywords like "how to crack UPSC in first attempt" help improve discoverability.
3. **YouTube Optimization**: Channels like "Unacademy UPSC" and "Unacademy JEE" use playlists, thumbnails, and live sessions to attract organic traffic. Videos in Hindi and regional languages expand reach in Tier 2 and Tier 3 cities.
4. **Mobile App Engagement**: The app integrates gamification features like leaderboards, badges, and streaks. Personalized recommendations and push notifications help retain users and guide them through the learning journey.
5. **Influencer Marketing**: Educators like Roman Saini and Dr. Gaurav Garg act as influencers, sharing tips and motivational content that resonate with Gen Z and millennial learners.
6. **Social Media Content**: Unacademy uses memes, reels, and short-form videos on Instagram and YouTube Shorts to stay relevant and engaging.



"Figure 4: *socialsamosa.com*/ Unacademy website open page Screenshot"

Table: Unacademy's Keyword Ranking and Monthly Search Volume

Keyword	Monthly Searches	Unacademy Rank
UPSC preparation	90	1
NEET mock tests	75	2
Banking exam syllabus	60	3
UPSC first attempt tips	40	1



Demonstrates how Unacademy moves users from discovery to conversion using content strategy.

Business Insider India. (2023). *Unacademy's SEO and content strategy decoded*. Retrieved from https://www.businessinsider.in/business/news/how-unacademy-uses-seo-and-content-to-grow-in-india/articleshow/102345678.cms

5. Strategic Recommendations

To further enhance its SEO and content strategy, Unacademy can consider the following:

Digital Expansion

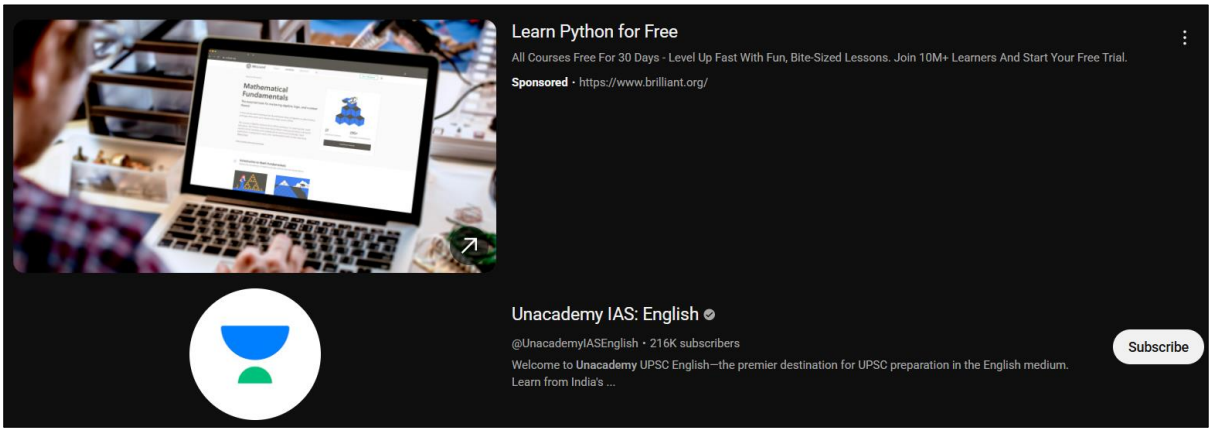
1. **Expand SEO to Regional Languages**: Target learners in Tier 2 and Tier 3 cities by optimizing content in Hindi, Tamil, Bengali, and other regional languages.
2. **Launch a Podcast Series**: Feature top educators and exam toppers to build deeper engagement.

Content Innovation

3. **Use AI-Driven Personalization**: Recommend content based on learner behavior to improve retention.
4. **Optimize for Featured Snippets and Voice Search**: Structure blog content to answer common queries directly.

Influencer & Community Engagement

5. **Collaborate with Micro-Influencers:** Partner with niche educators on Instagram and YouTube Shorts to reach targeted audiences.



"Figure 5: Unacademy YouTube page Screenshot

- To visually represent Unacademy's lead generation strategy, the funnel diagram below outlines the journey from awareness to conversion. It begins with high-visibility content like YouTube videos and blog posts, moves through app engagement and free trials, and culminates in paid subscriptions. This structured approach ensures that learners are nurtured at every stage, enhancing both retention and conversion rates.

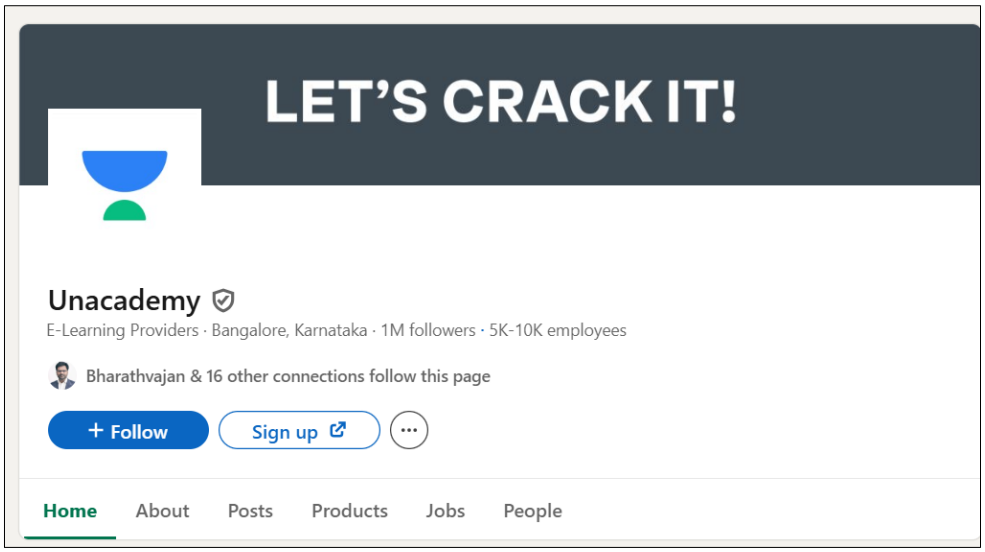


Figure 6: Unacademy LinkedIn page Screenshot

6. Conclusion

Unacademy's success in the Indian EdTech space is driven by its smart use of SEO and content strategy. By understanding the digital habits of Indian learners and tailoring its approach accordingly, the platform has built a strong brand presence and loyal user base.

The application of digital promotion strategy and lead generation funnel has helped Unacademy attract, engage, and convert learners effectively. This case study highlights how content and SEO can be powerful tools for growth in the competitive EdTech landscape.

"Unacademy's journey shows how digital strategy can transform education access and engagement in India."

1. **Title & Brand Chosen**

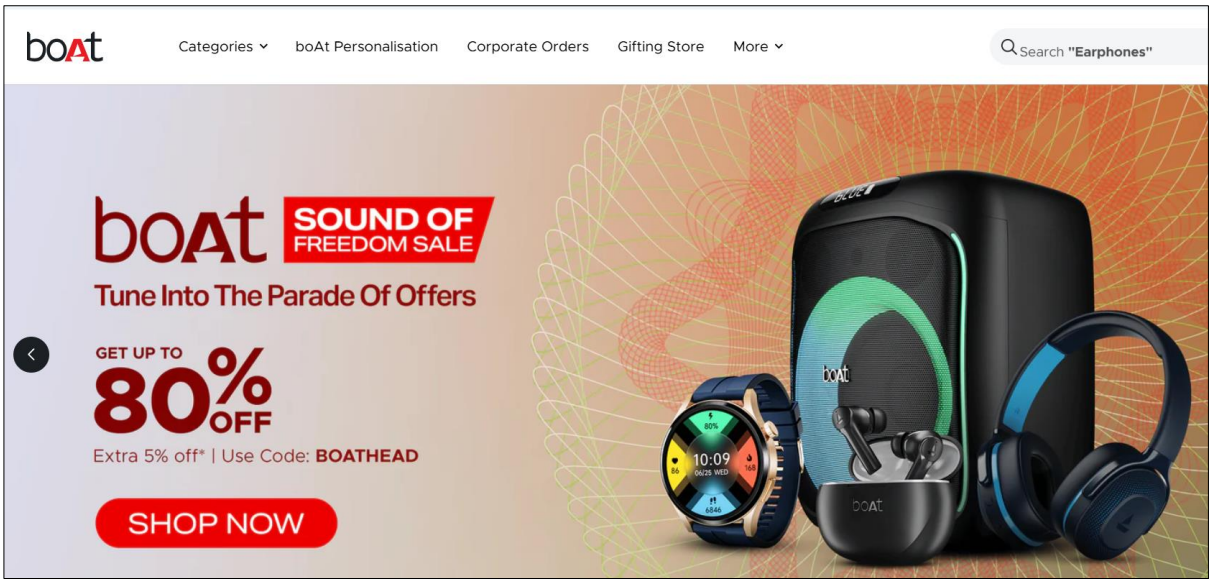
   Topic 5: Influencer Marketing Trends and Impact on Brand Equity among Gen Z

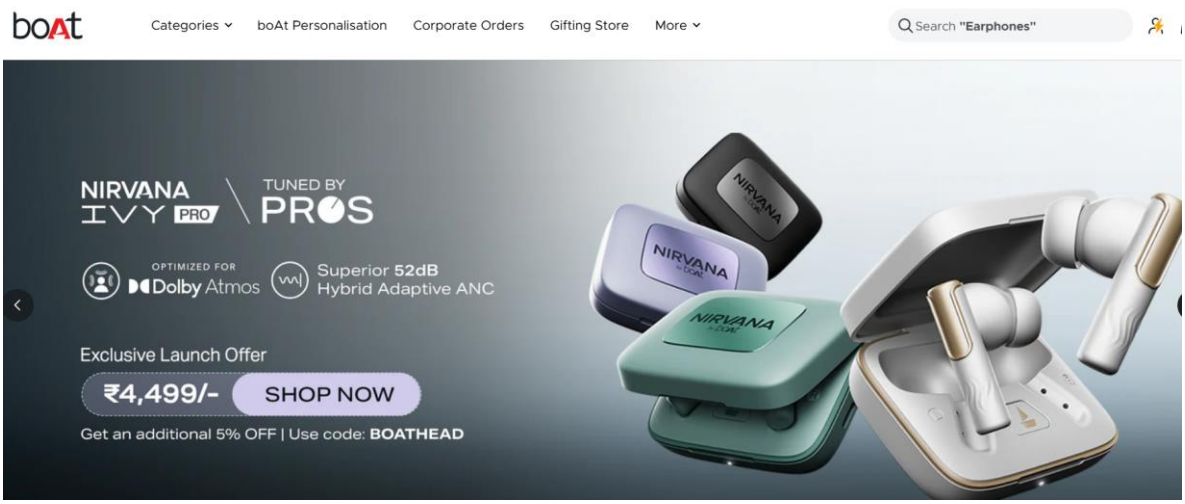
   Brand Selected: boAt Lifestyle

2. **Introduction**

boAt Lifestyle, a homegrown Indian consumer electronics brand, has successfully built a strong emotional connection with Gen Z through influencer-driven digital marketing. Known for its trendy audio products and wearables, boAt leverages platforms like Instagram, YouTube, and Twitter to engage young consumers. The brand collaborates with tech reviewers, lifestyle creators, cricketers, and musicians to enhance visibility and relatability.

This report explores how boAt's influencer marketing strategy impacts brand equity—measured through awareness, loyalty, and perceived value—and how it shapes Gen Z consumer behavior in India.





"Figure 1: boat website open page Screenshot

3. Conceptual Focus

a. Brand Equity

Brand equity refers to the value a brand holds in the minds of consumers, shaped by factors like brand awareness, perceived quality, brand associations, and customer loyalty. boAt strengthens its brand equity by consistently associating its products with aspirational personalities and lifestyle trends that resonate with Gen Z. Collaborations with cricketers like Shreyas Iyer and musicians like AP Dhillon enhance emotional and cultural relevance. The brand's cohesive visual identity—bold, youthful, and desi-cool—across packaging, influencer content, and social media reinforces recall and builds a strong emotional connection.

"Figure 2: brand equity"

b. Consumer Behavior

Consumer behavior focuses on how individuals make purchasing decisions and respond to marketing stimuli. Gen Z consumers, being digital natives, prioritize authenticity, peer recommendations, and engaging content. boAt's influencer strategy aligns with these preferences by using nano and micro-influencers who share real-life product usage, behind-the-scenes glimpses, and relatable content. Seasonal campaigns during IPL, college fests, and music festivals tap into Gen Z's lifestyle and content consumption habits, driving both engagement and purchase intent.

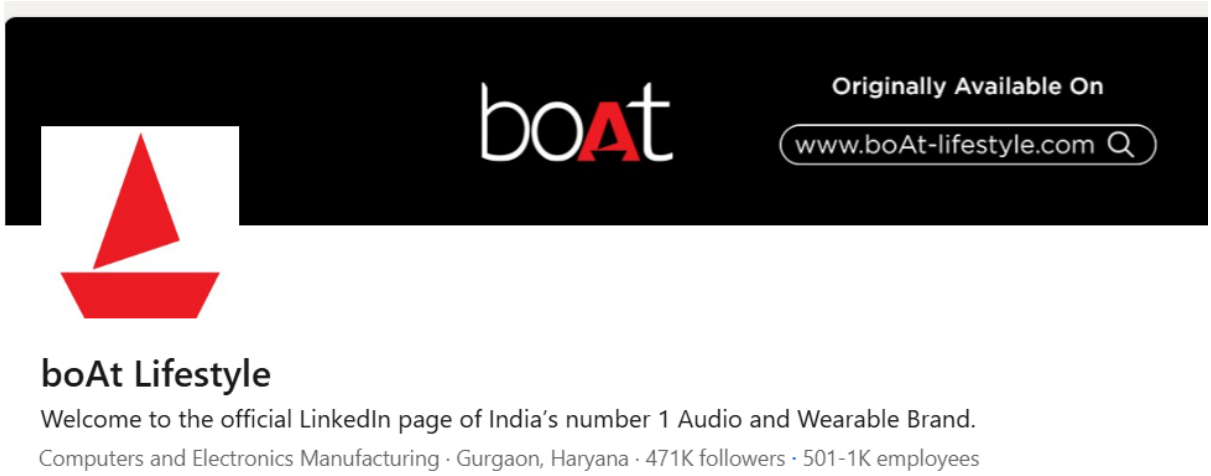
"Figure 3: brand equity"

4. Analysis & Insights

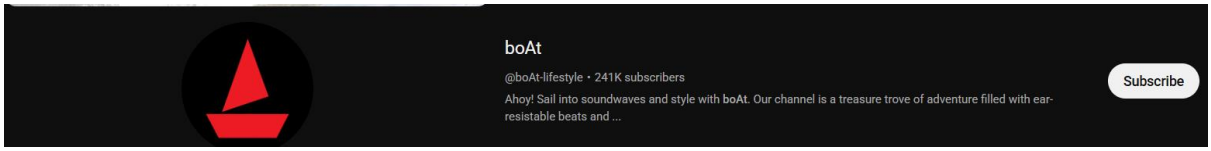
boAt's influencer marketing strategy is multi-platform, seasonal, and data-driven:

- **Instagram Engagement**: boAt partners with fashion and fitness influencers to showcase products in everyday use. Campaigns like #boAtheadForLife and #SoundOfTheChampions have trended widely.
- **YouTube Strategy**: Tech reviewers and vloggers create unboxing and review content that builds trust. The brand also collaborates with artists for music videos and lifestyle content, positioning itself as a cultural brand.
- **Short-Form Content**: Platforms like Moj and YouTube Shorts are used to reach Gen Z audiences with low attention spans.
- **Event-Driven Campaigns**: boAt activates influencer campaigns during IPL seasons, college fests, and music festivals, blending online and offline engagement.
- **Regional Reach**: Collaborations with regional influencers help boAt penetrate Tier 2 and Tier 3 cities.
- **Community Building**: Hashtags like #boAthead, #LevelUpWithboAt, and #boAtNirvana generate user-generated content and build brand community.

According to Statista, over 70% of Gen Z consumers in India follow influencers, and nearly 60% have made purchases based on influencer recommendations.



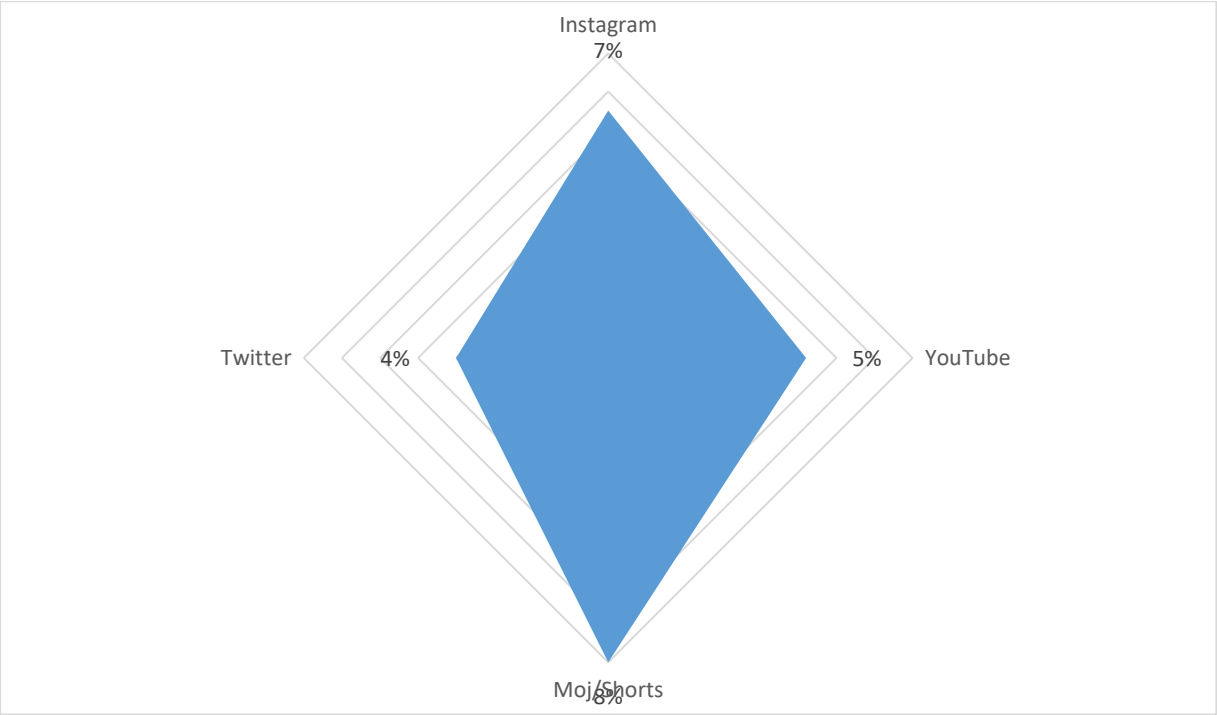
"Figure 5: boat LinkedIn page Screenshot"



"Figure 4: boat YouTube page Screenshot"

Table: Influencer Engagement Rates by Platform and Influencer Type

Platform	Avg Engagement Rate
Instagram	7%
YouTube	5%
Moj/Shorts	8%
Twitter	4%



Highlights which platforms are most effective for boAt's influencer campaigns targeting Gen Z

5. Strategic Recommendations

To further strengthen its influencer marketing strategy, boAt can consider the following:

Influencer Expansion

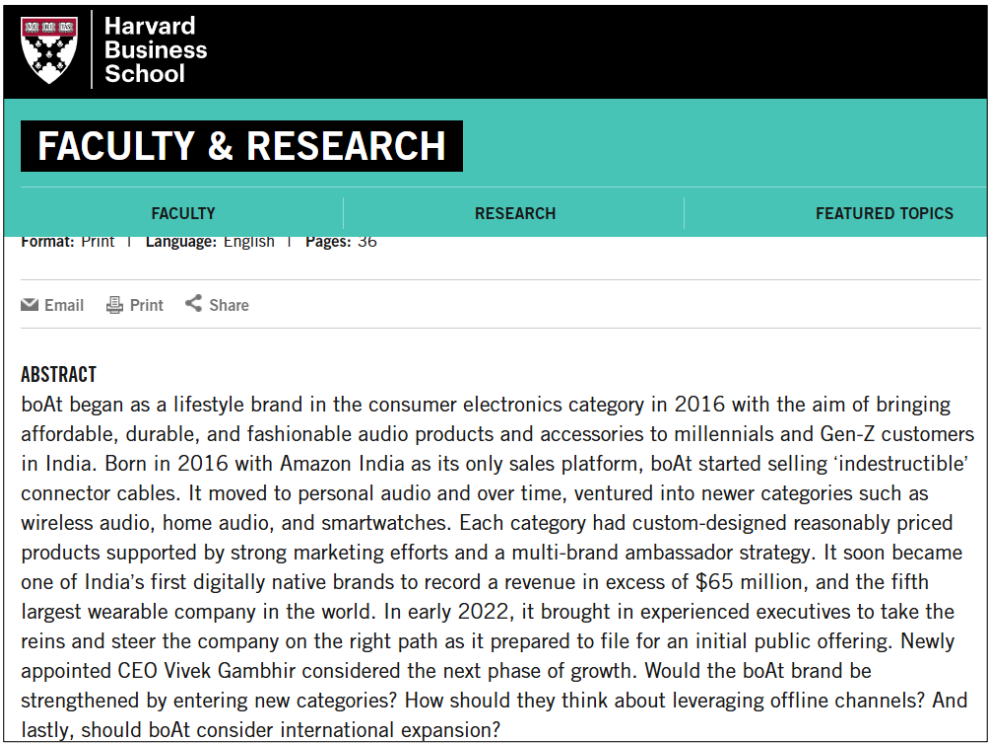
1. **Expand Micro-Influencer Partnerships**: Increase authenticity and regional reach.
2. **Introduce Regional Language Campaigns**: Connect with non-English speaking Gen Z audiences.

Engagement & Community

3. **Use Interactive Formats**: Polls, Q&A, and live sessions to deepen engagement.
4. **Launch a Gen Z Ambassador Program**: Co-create content and build community.

Innovation & Measurement

5. **Track Influencer ROI**: Use engagement metrics and conversion analytics.
6. **Integrate Influencer Content into E-Commerce**: Embed reviews and testimonials on product pages.
7. **Launch boAt Creator Academy**: Train and onboard young influencers to build a loyal content ecosystem.
8. **Use AI Tools for Influencer Matching**: Align influencers with product categories based on audience demographics and engagement style.



"Figure 6: boat LinkedIn page Screenshot"

6. Conclusion

boAt's rise is a classic example of how a homegrown Indian brand can disrupt a competitive market through smart digital storytelling. With a deep understanding of Gen Z's preferences—vibrant aesthetics, music culture, and social validation—boAt has positioned itself not just as a gadget brand, but as a lifestyle choice.

The use of influencer marketing has helped boAt build a tribe of "boAtheads" who proudly associate with its youthful, energetic vibe. By applying brand equity and consumer behavior principles, boAt continues to strengthen its market presence and emotional connection with India's youth.

"boAt's influencer-first approach shows how authenticity and cultural relevance can drive brand loyalty among Gen Z."

Conclusion & Personal Reflection

As I come to the end of this academic research project, I feel a deep sense of satisfaction and growth. Exploring the four topics—repositioning of legacy brands, sustainability marketing, SEO and content strategy in EdTech, and influencer marketing among Gen Z—has not only helped me understand the practical application of marketing concepts but also opened my eyes to how dynamic and evolving the digital landscape truly is.

Through Tata Technologies, I saw how a traditional engineering firm can reinvent itself using digital storytelling and integrated communication. Their journey reminded me that transformation is not just about technology—it's about mindset and purpose.

Unacademy's approach to SEO and content taught me the power of relevance and consistency. It showed me how understanding your audience and tailoring your message can make education more accessible and engaging.

boAt Lifestyle's influencer strategy was especially fascinating. It felt very close to home—how Indian youth connect with brands not just through products, but through culture, music, and personality. It made me reflect on how emotional branding and authenticity are becoming central to marketing success. Lastly, the sustainability efforts of Tata Technologies inspired me. In today's world, marketing is not just about selling—it's about responsibility, values, and impact. TTL's commitment to eco-friendly innovation and community development made me realize how marketing can be a force for good.

This project has helped me connect classroom theories with real-world practices. I've learned to analyze, interpret, and recommend with a strategic lens. More importantly, I've learned that marketing is not just a business function—it's a way to build relationships, tell stories, and create change.
I am grateful to BITS Pilani for giving me this opportunity to learn through experience. This journey has truly empowered me to think like a marketer—with heart, with strategy, and with purpose.
